

Water-Dissolved liquid including 5% of Coenzyme Q₁₀

PureSorb-Q™-L5-NF

Coenzyme Q₁₀, a fat-soluble substance that is insoluble in water, has been solubilized using Nisshin Pharma's proprietary technology and equipment. Nisshin Pharma is the first company in the world to succeed in industrializing Coenzyme Q₁₀.

Specifications

Test	Specification
Appearance	Yellow to orange viscous liquid
Assay(Coenzyme Q ₁₀)	Not less than 5.0%
Arsenic (as As ₂ O ₃)	Not more than 2ppm
Heavy metals (as Pb)	Not more than 20ppm
Total bacteria count	Not more than 300cfu/g
Coliforms	Negative (/2mL)

Liquid sample (Coenzyme Q₁₀ content per 100 mg of water)

(Blank, 10mg, 30mg, 50mg, 100mg, Undiluted solution(5000mg))

1kg(Resin container)

Shelf Life	24 months after production(in an unopened state)
Storage Conditions	Avoid light and store at 0-10°C (refrigerated)
Ingredients	Glycerin, Glycerin fatty acid ester, Coenzyme Q ₁₀
Labeling method	The amount of Coenzyme Q ₁₀ for a particular finished product is labeled with the Coenzyme Q ₁₀ content (5%) of the product in question.
Patent	Pending
